AGGRESSION INCREASES!

The people of Wal's Hole were left shaken yesterday after a day of vicious fighting between gangs. The fighting began between the previously mentioned Delaques (now identified by Guilders as "The Mad Professors") and a newly identified Escher gang called "Azazel's Angels". Seems that the "Angels" had been attracted to Wal's Hole by promises of loot by the other Escher gang (who had fought the Delaques previously) called the "Twisted Sisters". The "Mad Professors" were forced off by the dominant women. More fighting kicked off almost instantly as local troublemakers "Violencia" returned and attacked the Angels forcing

the newcomers to turn tail, seems the Arbites didn't much like them and they are now outlaws. Seemed that for a short while fighting stopped and people started to go back to business, unfortunately the "Twisted Sisters" decided to punish the Goliath's for their victory and after a long drawn out gun fight, "Violencia" backed down and left with two injured juves. Doc's later confirmed that one of the juves had lost 2 fingers in the fight. We later managed to get a comment from "Violencia's" leader Mackey (pictured); *"Always those damn sump sucking Escher who group up to take you down. We hadn't even got a new supply of ammo when those*

bitches jumped us! We'll get 'em back though."

The "Mad Professors" had had enough by noon and faced off two on four against the "Sisters" with the result being the same that they turned tail and fled.

After such a day here in Wal's Hole we hope that Arbites can come fix the problem.

ARBITES IN SHOOTOUT WITH HUNTER

As reported in the last issue the WOL-V35 sector is currently under quarantine and is out of bounds due to a mass outbreak of Neuron Plague and Arbites are keeping a full lockdown on the sector. This didn't stop one Bounty Hunter from trying to run the blockade and head INTO WOL-V35! No-one knows who the hunter is but Arbites clashed with the well armed man for several hours until he made a break for it into the sector. In the shootout 5 Arbite En-

forcers were hurt, one later turning out to be fatal. The dead Arbite was named as Arbite Hammer, who we had spoken to about the WOL-V35 situation. Wal's Hole's local Arbite; Arbite Vaughn gave this statement; *"The office of the Adeptus Arbites would care to extend their sympathies to Arbite Hammer's family, he is survived by a wife and two sons. As for this rogue hunter; if he ever returns from WOL-V35 we will track him down and arrest him. The full extent of the emperor's wrath will be extended to*

him and anyone who harbor's him"
